INTRODUCTION**

PURPOSE OF HANDBOOK

The purpose of the *Westmoreland Associate Degree Nursing Program Student Handbook* is to present general information and guidelines, related specifically to the associate degree nursing program.

The Westmoreland Associate Degree Nursing Program Student Handbook should be used in conjunction with, and does not duplicate information found in, the Westmoreland County Community College Catalog and Student Handbook

Students are responsible for information contained in the current Westmoreland Associate Degree Nursing Program Student Handbook, College Catalog and College Student Handbook.

Nursing students will observe all "Student Rights and Responsibilities" as outlined in the current *College Catalog* and *Student Handbook*.

Nursing students are encouraged to utilize all "Student Services and Resources" as outlined in the current *College Catalog* and *Student Handbook*.

Classes Begin	June 30
Independence Day Holiday (Closed)	July 4
2nd 5-Week Session Classes End	Aug 1
Grades Due	Aug 4 (12 p.m.)

GENERAL STUDENT INFORMATION

ACADEMIC REMEDIATION

Traditional and technology-based remediation is available for nursing students who are having difficulty acquiring the skills and/or knowledge necessary to succeed in the nursing program. Remediation is designed to meet student individual needs and assist them in improving performance in the classroom, campus laboratory, and/or clinical settings.

Students may be referred to the remediation laboratory instructors by faculty; or, students can schedule sessions with them independently.

ACCREDITATION AND APPROVAL

Westmoreland County Community College (the College or Westmoreland) is accredited by the Middle States Association of Colleges and Schools (middlestates.org.). The program is fully approved by the Pennsylvania State Board of Nursing (ST-NURSE@state.pa.us).

The Associate Degree Nursing Program of Westmoreland County Community College located in Youngwood, Pa. is accredited by the:

Accrediting Commission for Education in Nursing (ACEN)
3390 Peach Tree Rd. NE, Suite 1400
Atlanta, GA. 30326
404-975-5000.
www.acenursing.org

The most recent accreditation decision made by the ACEN Board of Commissioners for the associate degree nursing program is Continuing Accreditation.

View the public information disclosed by the ACEN regarding this program at <https://www.acenursing.us/accreditedprograms/programSearHCC.htm>

The Nursing AAS program is on provisional approval status by the Pennsylvania State Board of Nursing.

ADJUSTING EXAMINATION GRADES

Test items will be reviewed when 70% or more of the students in the section taking the test have answered the question incorrectly. When the instructor determines that an item is valid, the test question will be retained. If the question is determined to be invalid by the instructor, the item will be scored "correct" for all students. If the instructor determines there is more than one correct answer, the student will be given credit for the correct answers.

Students should address inquiries or appeals regarding individual examination grades to the instructor responsible for teaching the content in question. Inquires or appeals must be submitted within **three** days from the date the exam was given.

AVAILABILITY OF CLINICAL INSTRUCTOR

An instructor must be available in the clinical facility when students are providing direct patient care. The student must notify the Nursing Program office (724) 925-4271 and the nurse in charge of the clinical unit when an instructor is not available at the time of the clinical experience.

CLINICAL COMPLIANCE

To be eligible for clinical placement students must have met all deadlines for document uploads in their Castle Branch Account. In addition to meeting the upload deadline, all items must receive a green compliance approval check mark from Castle Branch. The student is responsible to maintain compliance for clinical education placement. Technical issues related to document uploads should be directed to the Castle Branch Customer Support team.

Students who miss deadlines or lack full compliance at time of clinical placement will be denied access to the clinical education site until full compliance is achieved. Students found to be out of compliance during a clinical rotation will be removed from the clinical education site until they demonstrate compliance. Missed clinical time may negatively impact the nursing course grade.

ELECTRONIC TRANSMISSION OF PLANS OF CARE

In order to protect patient confidentiality, the following precautions may be taken whenever plans of care or simulated charting are electronically transmitted between student and clinical instructor:

- Client's initials, DOB or room number will not be included on any forms of electronic communication.
- If initials are required, then the student will place their initial in the designated place.
- The client's age will be included on all electronic forms.

GRADING SCALE FOR NURSING COURSES

The grading scale is as follows:

A	90-100
B	80-89
C	70-79
D	60-69
F	59 and below

There will be no rounding of grades, no bonus points, or extra credit awarded within any nursing course.

NOTE: A minimum grade of 80% or a "B" grade is required for passing in any nursing program course.

LATE ASSIGNMENTS

Submitting any scheduled assignments late demonstrates a lack of professional commitment and may result in a reduced grade. Penalties for late assignments will be outlined in the individual course syllabus.

Note: Procedure for students arriving late for an exam are at the discretion of the individual instructor teaching the course. Please refer to your course syllabus for information. Extenuating circumstances may be considered by the faculty.

MISSED EXAMINATIONS

A student who anticipates missing a scheduled examination must contact the faculty responsible for presenting the content prior to the examination to reschedule that exam:

- An alternate form of the examination may be administered
- Failure to notify the faculty member prior to the examination and requesting to reschedule the missed exam will result in a grade of zero
- Failure to take the rescheduled examination at the designated time will result in a grade of zero (0)
- Students may only miss one (1) examination in any one (1) nursing course
- Extenuating circumstances may be considered.

MOBILE HANDHELD DEVICE/SMART PHONE CLINICAL/CAMPUS LABORATORY USAGE

Web access is listed on the nursing program website (www.westmoreland.edu/nursing)

Student Responsibilities:

- Devices need to be fully charged and ready for use at all times.
- Students will not turn on devices in the class or labs until instructed by faculty.
- Under no circumstances can the device be used to record conversations or to take pictures or video.
- If requested, students will show device to faculty or staff members.
- All tones for devices must be silenced while in class, labs, or clinical.
- Students will follow all facility policies including turning off phones in clinical setting and moving to approved area to access.
- Personal phone calls or texting is not permitted during class, labs, and clinical.
- Students will follow facility policies for disinfecting and cleaning devices upon arrival and departure from the clinical setting.
- It is the student's responsibility to keep physical possession of the device at all times.

Failure to follow these guidelines will result in disciplinary action up to and including failure of a course.

OBSERVATIONAL EXPERIENCES

Observational experiences used to meet clinical objectives/outcomes will have specific guidelines distributed with course materials

Students must be at least 18 years of age at time of first clinical experience.

PREPLANNING

Preplanning time is allotted prior to the clinical experience to enable students to gather data related to the assigned patient's health problem and nursing care.

- Westmoreland student identification along with appropriate facility identification **MUST** be worn during the preplanning experience. Business-like clothing (no shorts or blue jeans) is to be worn under a clean and well-pressed lab coat
- Students are **NOT** permitted to provide nursing care during the preplanning time.

PROGRAM HOURS

Formula for assigning credit to Nursing Courses:

1 credit	1 lecture hour
1 credit	3 nursing laboratory hours
1 credit	3 nursing clinical laboratory hours

Clinical Hours

Program Option	Total Clinical Hours	Hours of Simulation
Tradition Program Option Day or Evening	700.5	185.5 (26%)
Advanced Standing LPN Program Option	399	130 (32.5%)

Classroom Hours – Lecture & Laboratory

Program Option	Total Lecture Hours	Total laboratory Hours
Tradition Program Option Day or Evening	304.45	197.5
Advanced Standing LPN Program Option	335.7	204

STUDENT RECORDS

The nursing program maintains a record of each student currently enrolled. These records are maintained on Castle Branch, a password secure third-party compliance tracker and document management system.

Current Electronic student records may include:

- Student Data Sheet with current photo
- Student Responsibility and Assumption of Risk Forms
- Standards of Professional Conduct Acknowledgement
- Confidentiality of Information Acknowledgement
- Health Screening and Background clearances

Permanent student records include:

- Final Westmoreland County Community College digital transcript maintained by the college.

Individual course faculty maintain a digital gradebook in the Learning Management Systems (LMS).

The completed Clinical evaluation Tool is uploaded in individual course the LMS.

STYLE MANUAL FOR WRITTEN PRESENTATIONS

The most current edition of the Publication Manual of the American Psychological Association (APA) will be on reserve in the library. This manual can also be used as a reference for formal documentation.

TAPE RECORDING

Permission to audio tape record a lecture must be obtained from each classroom and laboratory instructor. Audio tape recording should be for self-study use only. You may not reproduce or disseminate the recording or information in any format. You are not permitted to video the classroom or laboratory presentation or utilize any electronic recording devices. Please refer to individual course syllabus for specific guidelines.

No taping, recording or copying may occur in any clinical type of experience assignment; this includes phones, electronic devices and/or other modes of recording or copying. Failure to abide by this guideline may result in disciplinary action.

WITNESSING LEGAL DOCUMENTS

Students are not permitted to act as a witness for the signing of any type of legal document during the clinical lab experience.

Dates Revised: 7/01/2024, 2/16/2017, 11/14/ 2012, 4/16/09, 5/19/08, 6/23/07

Responsibility: Program Eval/Bylaws Committee

THE PINNING CEREMONY

Background information: Being a student in the Westmoreland County Community College Associate Degree Nursing Program is a tremendous undertaking. Individuals are learning a new professional and occupational language, many new skills, and different ways of thinking in pursuit of a career in which they will become involved in the lives of individuals, families, and communities at some of their most vulnerable times.

Position Statement: The Associate Degree Nursing Program is responsible for teaching students how to be quality nurses who are competent to provide safe, knowledgeable and innovative care to all patients. To underscore the importance of the nursing role and the student's responsibility as a future healthcare professional, Westmoreland County Community College Associate Degree Nursing Program hosts a Pinning Ceremony after successful completion of the educational process.

The Pinning Ceremony holds its own meaning in the process of becoming a nurse. It is not meant to replace Commencement or degree conferral. Rather it adds an additional recognition and pledge related to professional commitment.

- The Pinning Ceremony occurs after the successful completion of the student's nursing program and signifies the completion of this entry level of education and official initiation into the profession.
- The Pinning Ceremony is modeled from the ceremony in the 1860's when Florence Nightingale was awarded the Red Cross of St. George in recognition for her service during the Crimean War.
- During the pinning ceremony the nursing program director or assigned faculty or representatives 'pin' students by placing a pin on their lapel and offer words of congratulations.

To conclude the pinning ceremony, students pledge to commit to providing care with compassion and embedding humanism in their work as a professional nurse.

- During the Westmoreland County Community College Associate Degree Nursing Program Pinning, graduates commit themselves to the service to others by reciting the International Council of Nursing Pledge which aligns with the mission statement of both the college and the nursing program.

The Pinning Ceremony is held in conjunction with college Commencement and is scheduled by the Nursing Program Director.

NURSING
PROGRAM**

**Section II
CURRICULUM**

DEFINITION OF TERMS

CRITICAL ELEMENTS:

The five critical elements (5 C's) are the essential attributes that the faculty believe all nursing graduates of the Westmoreland Nursing Program need to practice nursing. They provide the organizing framework of the curriculum and serve to facilitate the attainment of the knowledge, skills and behaviors/attitudes necessary to provide nursing care for individuals with basic human needs and/or alterations in basic human needs. The 5 C's are caring, competency, communication, critical thinking and commitment. The definition of each critical element is as follows:

- **CARING** – Caring creates an environment of being available for individuals and families beyond just doing for them. It compels the nurse to seek and apply evidence from the sciences to act for or with individuals based on a respect for the uniqueness and needs of each individual. The nurse also must provide patient- centered teaching and health education to meet the learning needs of individuals and groups in order to promote health and prevent disease.
- **COMPETENCY** – The safe and skillful performance of technical and/or management skills with minimum expenditure of time, effort, and resources.
 - **Technical skills** – Interventions, actions, techniques, or procedures necessary to implement the plan of care.
 - **Management skills** – Techniques, strategies, and tactics used when managing care for a group of patients.
- **COMMUNICATIONS** – A two-way process of sending and receiving messages. Skills associated with communication are verbal (spoken, written, or electronic) and non-verbal, both of which are influenced by sociological, physiological, psychological cultural, and environmental factors. These skills are necessary to initiate and maintain care of individuals and their families. Communication with patient, family, and health care team members is clear, concise, correct, and complete.
 - **Therapeutic Communication** – Facilitative and leads the patient and the nurse to greater understanding of patient behaviors and behavior alternatives. These are goal-directed skills that the nurse uses to provide the individual and family with the opportunity to identify and explore needs and/or problems, discover healthy ways of meeting basic needs; integrate new knowledge and skills, experience satisfying interpersonal relationships; and achieve the optimum level of health and wellness. These skills are aimed at preserving respect and fostering growth of patients and families.
 - **Collaborative Communication** – The foundation of effective teamwork. It requires verbal (spoken, written, or electronic) and non-verbal skills necessary for interacting, planning, decision making, problem solving, and goal setting with health team members to achieve positive patient centered outcomes. This is essential for fostering continuity of care and maintaining a culture of safety.
- **CLINICAL JUDGEMENT** – The knowledge-based, goal-directed process of gathering, analyzing, and synthesizing data to make decisions and formulate judgments in the provision and management of patient care. The nurse uses an objective scientific problem-solving process in a context of cultural, clinical, and individual variables to provide and manage care and to promote health for patients and families. The outcomes include safe effective care that meets the psychosocial and physiologic needs of the patient and family.
- **COMMITMENT** – A pledge to understand and adhere to standards of professional nursing practice and to abide by the Westmoreland Nursing Program, *Student Handbook*, and Agency Standards. It is essential to commit to upholding legal and ethical codes of professional nursing practice and to active lifelong learning to develop professional identity and on-going professional growth

OTHER TERMS:

- **EVIDENCE BASED PRACTICE:** A science-to-practice model of the use of critical thinking to apply research based and practice-based evidence to deliver quality, safe, and cost-sensitive care. It is based on practice guidelines and standards of care, as well as patient and family values and expectations.
- **NURSING EDUCATION:** Process that promotes the attainment of the knowledge, skills, attitudes, and safe behaviors needed to fulfill the roles of the nurse.
 - **Learning:** An active process of acquiring new knowledge, behaviors, and skills that results in a measurable change of behavior and achievement of learning outcomes.
 - **Student:** An individual committed to learning and growth who seeks to achieve the program/graduate outcomes of the nursing program.
 - **Faculty:** Academically and professionally qualified individuals who provide an environment that is conducive to student achievement of program outcomes. Faculty function as role models and resource persons who assess, plan, organize, implement, facilitate and validate student learning experiences. They also evaluate student progress toward end of program student outcomes. Faculty maintain expertise related to their teaching responsibilities.
 - **Associate Degree Nursing Education:** Enables the student to become a caring, competent, and committed professional nurse who can think critically, and communicate effectively and therapeutically in providing care. At the conclusion of the program, the student is granted an Associate in Applied Science Degree (AAS) and is eligible to apply for licensure as a Registered Nurse.
 - **Associate Degree Nursing Graduate:** An individual prepared to assume the role of the professional nurse in a variety of health care settings. A graduate of this program is eligible to apply for licensure as a Registered Nurse.

MISSION, VISION AND VALUES

MISSION

Westmoreland County Community College Associate Degree Nursing Program aligns its missions with the college as a whole. The program improves the quality of life in the community by educating future nurses, using an evidence-based practice curriculum that recognizes and supports the diversity of the adult learner.

VISION

Westmoreland County Community College Associate Degree Nursing Program is recognized as a premier provider of nursing education focused on student success, workforce development and cultural enrichment.

VALUES

The Westmoreland County Community College Associate Degree Nursing Program's five critical elements are reflected in its values:

The Westmoreland County Community College Associate Degree Nursing Program faculty, staff and students respect diversity and value the concepts of equity and inclusion (Caring)

The Westmoreland County Community College Associate Degree Nursing Program faculty, staff and students promote innovative learning environments (Competency)

The Westmoreland County Community College Associate Degree Nursing Program faculty and staff model accountability in accordance with the ANA Code of Ethics and Standards of Practice while providing safe, effective care to meet the psychological and physiological needs of patients and their families. (Commitment, Clinical Judgement))

The Westmoreland County Community College Associate Degree Nursing Program faculty, staff and students demonstrate collaboration and teamwork while interacting with community member. (Communication)

CURRICULUM ORGANIZING STRUCTURE

MASLOW'S HEIRARCHY OF NEEDS: Needs that are present across the life span that may be satisfied or altered as related to health or illness. Basic human needs and alterations in basic human needs provide the structure for organizing common health problems and related nursing care and well-being within clinical nursing courses.

Within our curriculum, these Basic Human Needs are categorized as:

- Physiological (oxygenation, nutrition/elimination, and activity/rest)
- Safety and Security (infection control, safety, mobility)
- Psychosocial (relationships, mental health, sexuality)
- Self-esteem (health promotion, patient/family teaching, respect for diversity)
- Self-actualization (self-care, motivation for wellness, acceptance)

QUALITY and SAFETY EDUCATION in NURSING

The Westmoreland Nursing Program is aligned to the QSEN (Quality and Safety Education in Nursing) competencies to ensure care is provided within the legal and ethical framework of safe nursing practice.

QSEN Competencies are focused on the preparation of future nurses with the knowledge, skills and attitudes necessary to continuously improve the quality and safety standards in healthcare and nursing.

The six (6) competencies are:

Patient Centered Care- Recognize the patient or designee as the source of control and full partner in providing compassionate and coordinated care based on respect for patient's preferences, values, and needs.

Teamwork and Collaboration-Function effectively within nursing and inter-professional teams, fostering open communication, mutual respect, and shared decision-making to achieve quality patient care.

Evidenced Based Practice-Integrate best current evidence with clinical expertise and patient/family preferences and values for delivery of optimal health care.

Quality Improvement-Use data to monitor the outcomes of care processes and use improvement methods to design and test changes to continuously improve the quality and safety of health care systems.

Safety-Minimizes risk of harm to patients and providers through both system effectiveness and individual performance.

Informatics-Use information and technology to communicate, manage knowledge, mitigate error, and support decision making.

FIVE CRITICAL ELEMENTS (definitions on page 16)

The 5 Critical Element (5 C's) serve as the organizing framework of the curriculum to facilitate the attainment of the knowledge, skills and behaviors/attitudes necessary to provide safe nursing care for individuals with basic human needs and/or alterations in basic human needs.

The 5 C's: caring; competency; communication; clinical judgement; and commitment are the essential attributes that the faculty believes all nursing graduates of the Westmoreland Nursing Program need to practice nursing.

Next due: Spring 2027

CURRICULUM TERMS

End of Program Student Learning Outcomes (EOPSLO) – Student performance indicators which evidence the satisfactory completion of the educational program.

Course Student Learning Outcomes (CSLO) – Measurable behaviors that must be satisfactorily demonstrated by a student at the completion of a learning experience.

General Course Objectives – Identifies what the student should learn in each course. They serve as the basis for the development of specific Content Objectives and the Outline of Content for each course. They also serve as the basis for the evaluation of student progress toward the development of the knowledge, skills, and behavior necessary to pass the course and progress in the Program.

Content Objectives – Identifies specific knowledge and skills to be taught and tested in each course and defines specific learning activities in theory and campus lab components of each course. All content presented in a course flows from a course objective(s). Each content objective is coded to demonstrate the relationship to the course objective(s). The course objectives, content objectives, outline of content and learning activities are identified in each course outline.

END OF PROGRAM STUDENT LEARNING OUTCOMES

The graduate of the **Associate Degree Nursing Program** is prepared to assume the role of the professional nurse in complex environments. This curriculum is designed to prepare the graduate to:

Caring (QSEN: Patient Centered Care)

1. Provide safe, quality, evidenced-based, patient-centered care with respect for diversity across the lifespan.

Competency (QSEN: Safety)

2. Implement technical aspects of care by following standards of safe, professional practice.

Communication (QSEN: Teamwork and Collaboration)

3. Implement therapeutic and professional communication when participating in the collaborative care of patients and their families.

Clinical Judgement (QSEN: Evidence Based Practice and Informatics)

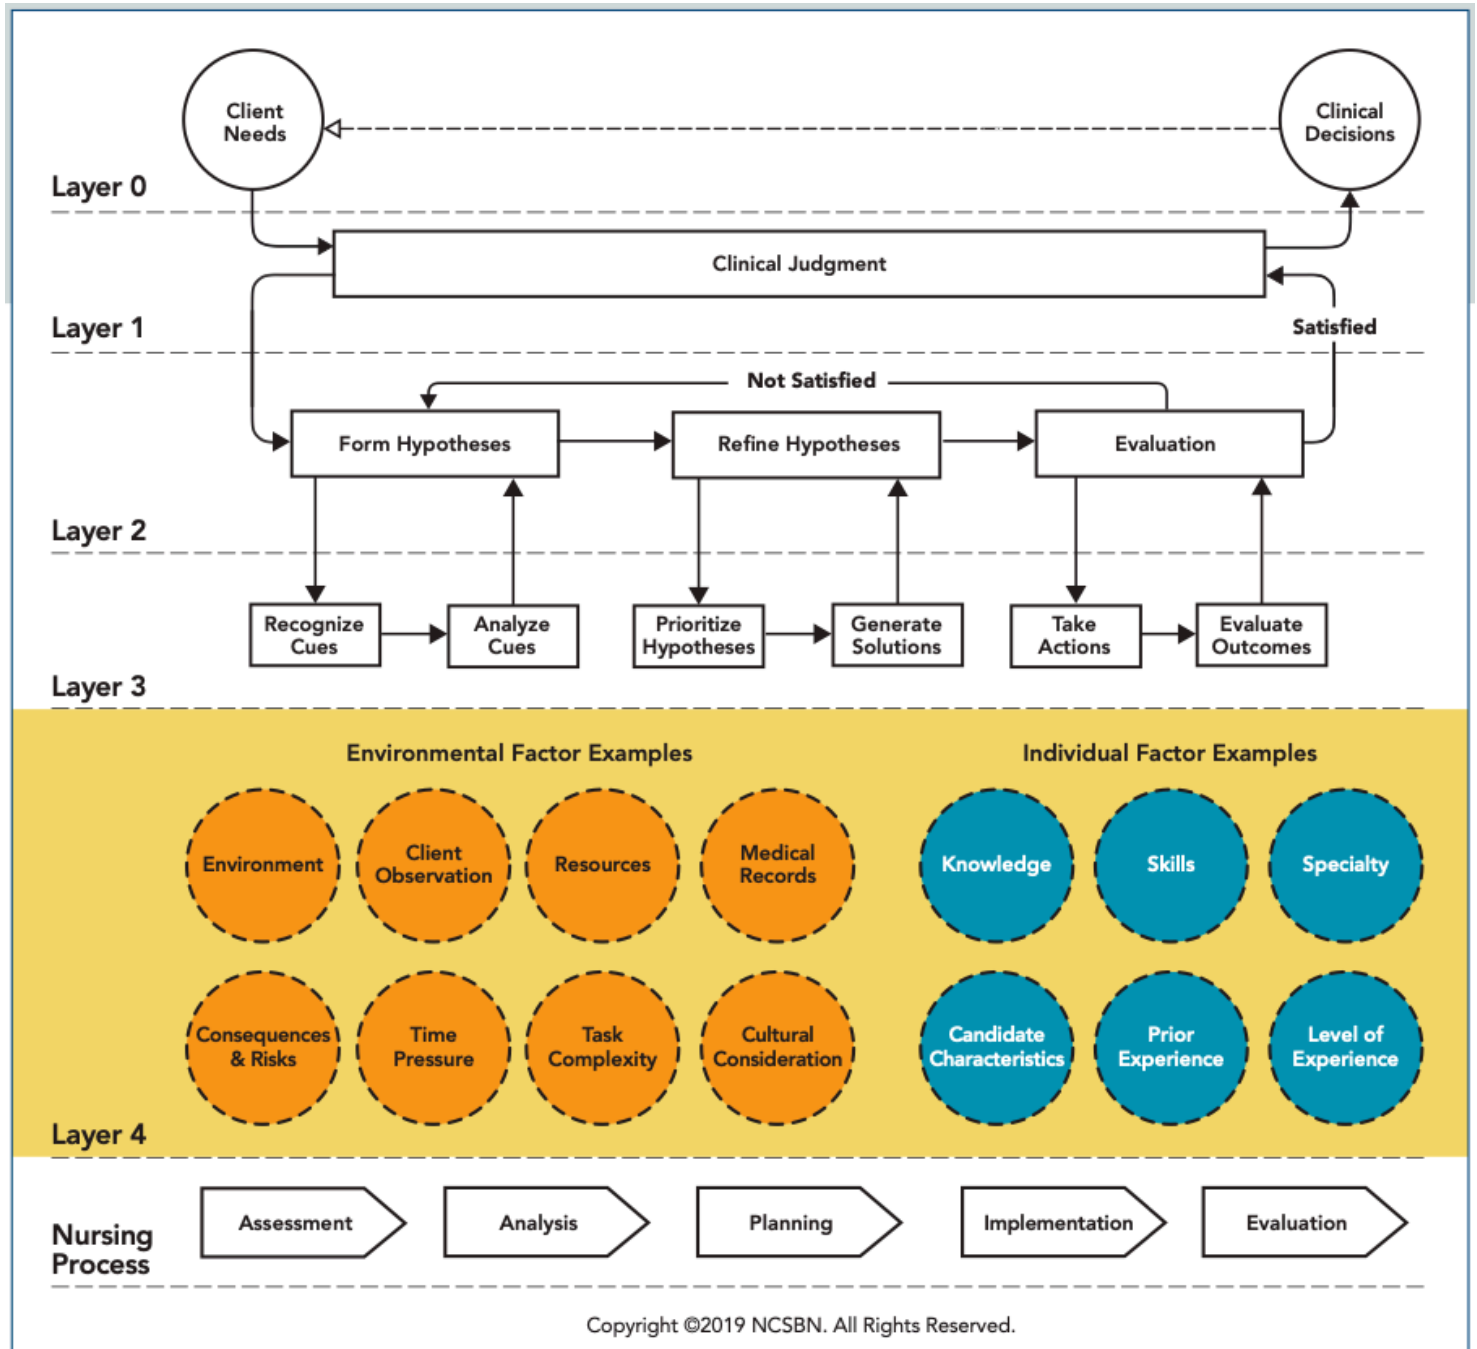

4. Use the nursing process, critical thinking, and clinical reasoning to manage patient care.
5. Use information technologies to coordinate safe care for individuals and their families.

Commitment (QSEN: Quality Improvement)

6. Incorporate nursing actions within the legal and ethical framework of nursing practice by conducting self in a civil and professional manner.

NCSBN CLINICAL JUDGEMENT MODEL

Westmoreland County Community College Nursing

PROGRAM CURRICULAR PROGRESSION DEFINITIONS

End of Program Student Learning Outcomes (EOPSLOs)

- The EOPSLOs are those outcomes that are expected to be demonstrated by a nursing graduate of the Westmoreland County Community College Nursing Program at/by the conclusion of the program.
- Located on the Curriculum Progression Map, Faculty Handbook, and Student Handbook

Course Student Learning Outcomes (CSLOs)

- The course student learning outcomes serve to demonstrate progression throughout the curriculum for both didactic and clinical components of courses.
- The CSLOs support the meeting of the EOPSLOs.
- Located on the Curriculum Progression Map, on course syllabi, and clinical evaluation tools.

General Course Objectives (GCOs)

- The general course objectives are specific to each course and support the meeting of the CSLOs.
- On average there are between 7-11 general course objectives.
- The general course objectives are found on the course syllabi.

Content Objectives

- These objectives are specific to the content that is taught in each course.
- May be evaluated through various assessment methods.
- Support both the GCOs and the CSLOs of each course.
- Located in the content outline of each course

Clinical Objectives

- These objectives are specific to the content taught in each clinical course.
- These objectives may be evaluated through the student's participation in clinical, simulation, and/or skills laboratories.
- Support both the GCOs and the CSLOs of each course.
- Located on the clinical evaluation tool.

PROGRAM GUIDELINES**

ABILITIES REQUIRED IN NURSING COURSES GUIDELINES

Purpose: To ensure nurses practice safely, they may possess functional abilities that relate to the behavioral components of competence as defined by the National Council of State Boards of Nursing.

Guidelines: The nursing program require students to possess the following functional abilities; however, affiliating institutions may require or impose restrictions not listed:

1. Gross motor skills to:
 - Move within tight spaces
 - Sit and maintain balance
 - Stand and maintain balance
 - Reach above shoulder (ex IVs)
 - Reach below waist (ex: plug-ins)
2. Fine motor skills to:
 - Pick up objects with hands
 - Grasp small objects with hands
 - Write with pen or pencil
 - Key/type use (ex: use a computer)
 - Pinch/pick or otherwise work with fingers (ex: syringe)
 - Twist (ex: turn knobs with hands)
 - Squeeze with finger (ex: eye dropper)
3. Physical endurance to:
 - Stand (ex at client side during procedure)
 - Sustain repetitive movements (ex: CPR)
 - Maintain physical tolerance (ex: work entire shift)
4. Physical strength to:
 - Push and pull 25 pounds (ex: position clients)
 - Support 25 pounds of weight (ex: ambulate clients)
 - Move light objects up to 10 pounds
 - Move heavy objects weighing from 10 to 50 pounds
 - Defend self against combative client
 - Carry equipment/supplies
 - Use upper body strength (ex: CPR, restrain a client)
 - Squeeze with hands (ex: fire extinguisher)
5. Mobility to:
 - Twist
 - Bend
 - Stoop/squat
 - Move quickly
 - Climb (ladders, stools, stairs)
 - Walk
6. Hearing acuity to:
 - Hear normal speaking sounds
 - Hear faint voices
 - Hear faint body sounds (ex: BP)
 - Hear in situations not able to see lips (ex: when using masks)
 - Hear auditory alarms

7. Visual acuity to:
 - See objects up to 20 inches away
 - See objects up to 20 feet away
 - See objects more than 20 feet away
 - Use depth perception
 - Use peripheral vision
 - Distinguish color
 - Distinguish color intensity
8. Tactile ability to:
 - Feel vibrations
 - Detect temperature
 - Feel differences in surface Characteristics (ex: skin turgor)
 - Feel differences in sizes, shapes (ex: palpate vein)
 - Detect environmental temperature
9. Olfactory acuity to:
 - Detect odors from client
 - Detect smoke
 - Detect gases or noxious smells
10. Reading ability to:
 - Read and understand written documents
11. Math competence to:
 - Read and understand columns of writing (ex: flow sheets)
 - Read digital displays
 - Read graphic printouts (ex: I&O)
 - Calibrate equipment
 - Convert numbers to/from metric
 - Read graphs (ex: vital sign sheets)
 - Tell time
 - Measure time (duration)
 - Count rates (pulse rate)
 - Use measuring tools (thermometer)
 - Read measurement marks (scales)
 - Add, subtract, multiply, divide
 - Compute fractions (medication dosages)
 - Use a calculator
 - Write numbers in records
12. Emotional stability to:
 - Establish therapeutic boundaries
 - Provide client with emotional support
 - Adapt to Changing environment/stress
 - Deal with unexpected (ex: crisis)
 - Focus attention on task
 - Monitor own emotions
 - Perform multiple responsibilities concurrently
 - Handle strong emotions
 - Participate in Simulation Activities

13. Analytical thinking skills to:

- Transfer knowledge from one situation to another
- Process information
- Evaluate outcomes
- Problem solve
- Prioritize tasks
- Use long term memory
- Use short term memory

14. Critical thinking skills to:

- Identify cause-effect relationships
- Plan/control activities for others
- Synthesize knowledge and skills
- Sequence information

15. Interpersonal skills to:

- Negotiate interpersonal conflict
- Respect differences in clients
- Establish rapport with clients
- Establish rapport with coworkers

16. Communication skills to:

- Teach (client, family)
- Explain procedures
- Give oral reports
- Interact with others
- Speak on the telephone
- Influence people
- Direct activities of others
- Convey information through writing (progress notes)

Adapted from: "Guidelines for Using Results of Functional Abilities Studies and Other Resources," National Council of State Boards of Nursing, Inc.

As stated on the previous pages, the abilities listed are required by the Westmoreland nursing program for all nursing courses. However affiliating institutions may require abilities or may impose restrictions not listed above.

The need to use a prescribed medication or an assistive device to enhance deficits in these abilities will be considered. Documentation from the physician must be submitted to the nursing program director to substantiate needs. Documentation from the attending physician does not necessarily guarantee the student will be able to enter and/or continue in the nursing program. The nursing program director will notify the student of any action that must be taken in regard to this request.

CARDIOPULMONARY RESUSCITATION CERTIFICATION GUIDELINES

Purpose: All nursing students must have certification in cardiopulmonary resuscitation to meet the requirements of safe patient care in the facilities where they are assigned.

Guideline: A minimum ability of Basic Cardiac Life Support as defined by the American Heart Association (AHA) certification is required. The acceptable Course is "Basic Life support for Health Care Providers "

- The course will include demonstration and practice of:
 - adult, child and infant CPR skills for one and two rescuers
 - management of foreign body airway obstruction for adult, child & infant
 - AED (automated electric defibrillator) for adult, child and Infant CPR
 - Proper use of barrier devices and the bag valve mask.
- Students are responsible for submitting evidence of certification to their Castle Branch account one month prior to starting the nursing courses.
- Certification must remain valid throughout the program.

Failure to maintain a valid CPR certification and upload the certificate of course completion, will prevent the student from participating in the clinical education portion of each nursing course and will result in course failure.

GUIDELINE FOR REQUIRED PERSONAL LIABILITY INSURANCE

Purpose: Professional Liability insurance, sometimes referred to as malpractice or error and omissions insurance, is designed to protect professional students against claims that may involve negligence, misrepresentation, or violation of good faith. The clinical affiliates' agreements between Westmoreland College and the clinical sites utilized for clinical education require each student maintain professional liability insurance in the specified amounts.

Guideline: All nursing students are required to purchase and maintain active personal liability insurance. All students must submit a certificate of insurance in the amount of 1 million dollars per occurrence and 6 million dollars annual aggregate.

Information related to obtaining personal liability insurance is provided during the Nursing Program mandatory orientation sessions.

Certificates of insurance must be valid for one year and uploaded before the due dates for each entering class.

Students are required to annually upload a certificate of insurance to their Castle Branch™ account by the following dates:

- August 1 for all cohorts beginning in Fall term- (daylight program option)
- January 1 for all cohorts beginning in Spring term- (evening program option)
- June 1 for LPN to RN students entering Summer term

Failure to purchase or upload the certificate of liability will prevent the student from participating in the clinical education portion of each nursing course and will result in course failure.

DENIAL OF NURSING LICENSURE RELATED TO FELONIOUS ACT GUIDELINES

Purpose: The State Board of Nursing prohibits issuance of licenses to applicants who have been charged or convicted of felonious acts. Conviction includes a judgment, an admission of guilt or a plea of nolo contendere, probation without verdict, or an incomplete ARD (Accelerated Rehabilitative Disposition).

Guideline: The Board shall not issue a license to any applicant who had been:

- Charged or Convicted of a felonious act prohibited by the act of April 14, 1972 (P. L. 233, No. 64) known as The Controlled Substance Drug, Device and Cosmetic Act; or
- Charged or Convicted of a felony relating to a controlled substance in a court of law of the United States or any other state, territory, or country unless:
 - At least ten years have elapsed from the date of the conviction;
 - The applicant satisfactorily demonstrates to the Board significant progress in personal rehabilitation since the conviction and that licensure should not create a substantial risk of further violation
 - The applicant otherwise satisfies the qualifications contained in this act.

Note: According to federal sentencing guidelines any punishment lasting over one year is considered a felony.

Students seeking acceptance into the nursing program who may have criminal charges on either a local or federal background check should review the Act 53 Best Practice Guideline on the PA State Board of Nursing website:

<https://www.dos.pa.gov/ProfessionalLicensing/BoardsCommissions/Nursing>

HEALTH STATUS GUIDELINES

Purpose: Nursing students care for individuals in a variety of health care facilities. Therefore, all students are required to validate satisfactory health status prior to enrollment in both Levels I and II of the nursing program.

Guideline: The treatment and management of health issues and/or injuries are the responsibility of the student.

A. Physical Examination

- A medical examination, prior to the initial program enrollment (preliminary health requirement) must indicate satisfactory health status and include a complete physical examination with two- step PPD (done within three months prior to program), and immunizations as recommended by CDC guidelines and required by clinical affiliation agreements and an annual urine drug screen.
 - If the PPD is or has been positive, further validation of absence of active disease is required by Chest x-ray
 - Required immunizations include but are not limited to:
 - MMR (measles, mumps, rubella)
 - Varicella
 - Tdap within the last 10 years
 - Hepatitis B vaccination series
 - Annual Influenza vaccine
 - COVID -19 vaccine
- Subsequent health requirement prior to Level II requires a one-step PPD.
- Students must possess all functional abilities identified by Westmoreland County Community College nursing program.
- All health forms must be completed and uploaded to Castle Branch by the date indicated during the initial Program Orientation meeting. If forms are not returned by date specified, the course registration may be cancelled.
- The director of the nursing program and/or a faculty member may request evidence of satisfactory results on a special health examination if there is reason to suggest that the health of students/ patients is threatened.

B. Clinical: Injury or Illness

- A student, who is injured or becomes seriously ill while on clinical or in route to clinical, is advised to seek medical assistance at hospital emergency room, a medical unit or a physician's office.
- It is the student's responsibility to make the decision for care unless otherwise mandated by the nursing program.
- If the student is a minor, the decision for care becomes the responsibility of the guardian
- The student or the guardian of a minor student has the option of refusing treatment or choosing the physician or agency from which treatment is desired, unless otherwise mandated by the nursing program.
- The student should be advised to contact a family member or friend to seek assistance. If the student is a minor, it is the responsibility of the student to notify the guardian. If the minor student is unable, the instructor may notify the guardian.
- The instructor is not responsible for transport of a student who is ill or injured
- The student is financially responsible for all required examinations and any treatment for accidents or injuries incurred while in the clinical setting or in route to or from the clinical experience.

C. Campus Laboratory: Injury or Illness

- Follow Westmoreland's procedure for dealing with illness or injury.

D. Pregnancy and Title IX

- Title IX of the Education Amendments of 1972, or "Title IX," is a federal law that prohibits discrimination based on sex in educational programs. The law is a key tool for ensuring that all people have an equal opportunity for education, regardless of their sex or gender.
- Title IX makes it illegal to discriminate because of sex, which includes discrimination on the basis of pregnancy, childbirth, lactation, miscarriage, abortion, or related conditions, including recovery.
- Title IX also ensures the right for pregnant and postpartum students to get changes at school when needed, and to take medically necessary leave. The law bans harassment, intimidation, or other discrimination in schools because of pregnancy-related conditions.
- Pregnant students are encouraged to notify the Title IX Officer and/or the Disability Counselor of their pregnancy and/or related conditions.

E. Return after Medical Withdrawal

- A student returning to the nursing program after a college approved medical withdrawal or medical leave, must provide documentation to the program director of ability to meet the functional abilities that relate to the behavioral components of competence as defined by the National Council of State Boards of Nursing. See *"Abilities Required in Nursing Courses Guidelines"*
- The documentation must be from the health care provider, or a provider in the same discipline, who initiated the Medical Withdrawal.

URINE DRUG SCREEN GUIDELINES – Ordered through Castle Branch

Purpose: Nursing students care for individuals in a variety of health care facilities.

Preliminary (prior to enrollment and continued throughout enrollment) Requirements have been established to validate the satisfactory health status of students entering Westmoreland's nursing program

Guideline: A urine drug screen must be obtained as part of the preliminary health requirements of the nursing program. The urine drug screen must be repeated annually and also after an absence of three months or longer. A random urine drug screen may be required **for cause** at any time during the student's enrollment. Urine Drug screens are ordered, paid for, collected and resulted through Castle Branch

- The Urine Drug Screen is ordered and paid for through the student's personal Castle Branch account using the code WA62dt
- Collection sites for urine specimen collection will be assigned by Castle Branch
- The Nursing Program Director will provide collection dates during Mandatory New Student Orientation and at the end of the Spring Semester. The urine drug screen must be dated within those dates
- Failure to meet the due date for the submission of the urine drug screen report may result in cancellation of all nursing classes.
- The report of the urine drug screen results is posted to the student's account in Castle Branch
- A positive urine drug screen, either prior to admission to the program, or in connection with the annual required drug screen, may result in the student not being permitted to begin or continue in the program
 - Please note that a positive test for marijuana (THC) will be deemed a positive test that will serve to **disqualify** a student from entry into and/or continuation in the program, even if the student has been lawfully certifies to use medical marijuana and/or possesses a valid medical marijuana identification card issued in accordance with applicable state law.
 - As a recipient of federal funds, Westmoreland County Community College is subject to and complies with the Federal Drug Free Schools and Communities Act Amendments of 1989, pursuant to which all forms of marijuana, including medical marijuana, are classified as prohibited controlled substances.
- Medical reviewer at Castle Branch will evaluate all positive Urine drug screens and may make the final decision on the Urine Drug Screen status
- All Urine Drug Screens are at the student's expense.

GUIDELINE FOR ACADEMIC PROGRESSION IN THE ASSOCIATE DEGREE NURSING PROGRAM

Purpose: Students accepted into the Westmoreland County Community College Associate Degree Nursing Program must fulfill defined criteria to progress and/or graduate from this program.

Guideline: Progression and completion of the nursing program is contingent upon satisfactory academic performance.

Definition of terms:

- Progression in the Associate Degree Nursing Program is contingent upon the achievement of a "B" grade or better in all Nursing Courses.
- Graduation from the Associate Degree Nursing Program is contingent upon completion of all Nursing Courses with a "B" grade or better and **General Education** courses with a "C" grade or better and a minimal 2.0 GPA. This is in addition to any specified Westmoreland College requirements for Graduation.

Progression in nursing courses

Traditional Daylight/Full Time Program Option

- Achievement of a "C" grade or better in co-requisite courses is required for progression to the next semester. BIO 171 and CPT 150 are required to be completed with a "C" grade or better, prior to entering First Semester of Nursing.
 - **Semester I** - NSG 112, NSG 114 and NSG 116 with a "B" grade or better as well as BIO 172 must be completed with a "C" grade or better to progress to Semester II and NSG 124
 - **Semester II** - NSG 124 must be successfully completed per above progression guidelines and PSY 160 must be completed with a "C" grade or better to progress to Semester III
 - **Semester III – (Fall 2024 only)** Level II Nursing Courses must be successfully completed per above progression guidelines and ENG 161 must be completed with a "C" grade or better to progress to the Semester IV
 - **Semester IV – (Spring 2025 only)** NSG 225, NSG 240, NSG 255, NSG 260 and NSG 270 must all be successfully completed per above progression guidelines, including the completion of any "I" grade assigned, before the start of NSG 280. All Level II Nursing Courses must be successfully completed per above progression guidelines for graduation. General Education course work: BIO 265, MTH elective and ENG 164 must be completed with a "C" grade or better prior to graduation.

Evening/Part-time Program Option

- Achievement of a "C" grade or better in co-requisite courses is required for progression to the next semester. BIO 171, BIO 172, PSY 160, ENG 161 and CPT 150 are required to be completed with a "C" grade or better, prior to entering First Semester of Nursing.
 - **Semester I –(Spring 2025)** NSG 112, NSG 114 and NSG 116 with a "B" grade or better.
 - **Semester II –(Fall 2024)** NSG 124 must be successfully completed per above progression guidelines.
 - **Semester III – (Spring 2025)** Level II Nursing Courses must be successfully completed per above progression guidelines with a "B" grade or better to progress to the Semester IV
 - **Semester IV (Fall 2025-** NSG 225, NSG 240, NSG 255, NSG 260 and NSG 270 must all be successfully completed per above progression guidelines, including the completion of any "I" grade assigned, before the start of NSG 280. All Level II Nursing Courses must be successfully completed per above progression guidelines for graduation. General Education course work: BIO 265, MTH elective and ENG 164 must be completed with a "C" grade or better prior to graduation.

General Progression guidelines

1. A nursing student who is unsuccessful, for the first time, in any Nursing course, may not progress to the next semester, but may complete the current semester of study.
 - Students who are not successful in completing NSG 112, NSG 114 or NSG 116 may not progress to NSG 124 and must repeat the failed course.
 - Students who are not successful in completing NSG 124 may not progress to Level II course work and must repeat NSG 124.
Fall 2024 and Spring 2025 Level II only:
 - Level II students who are not successful in completing a 5-week course, including course failure or approved medical withdrawal, may elect to continue with the remainder of the scheduled semester. The course in which they were not successful will need to be repeated as the first course taken in the returning subsequent semester.
 - Only one nursing course may be completed during each 5-week session.
 - The need to repeat a nursing course may delay planned graduation up to a year.
 - NSG 225, NSG 240, NSG 255, NSG 260 and NSG 270 must be successfully completed, including the completion of any "I" grade assigned, prior to starting NSG 280.
2. Students required to repeat a nursing course must petition for readmission. See [Guideline for Petition to Return to the Nursing Program](#).
3. Only one nursing course may be repeated due to failure or withdrawal. A second course failure or withdrawal within the nursing program will result in dismissal from the Nursing Program.
4. Students who were not successful in two Nursing courses may apply for re-admission, including re-testing.

Date revised: 6/01/2023, Fall 2022; 7/1/2020, 5/20/2019

Date reviewed: 6/30/2024, 3/19/2020, 12/1/2019, 1/18/2018

Next date for review: Fall 2027

Responsibility: Program Eval/Bylaws Committee

GUIDELINE FOR PETITION TO RETURN TO THE NURSING PROGRAM

Purpose: Students who fail any Nursing Course; withdraw from any Nursing Course; or are granted a Medical Withdrawal from any Nursing Course, in the Associate Degree Nursing Program, must petition for readmission.

Guideline: Students must petition for readmission within one Academic Year after failure or withdrawal. Any petition for readmission occurring *after* one Academic Year is not considered. After a year of absence, the student must reapply to the Nursing Program and restart the program from the beginning, if they are accepted. Throughout the entire Nursing Program, a student may petition only one time for readmission. A second petition will not be considered.

Definition of terms:

Nursing Course Failure:

- **For all students in the Daylight Program Option, and NSG 124 in the Evening program Option, continuing or returning,** any final letter grade lower than a "B" or a numerical grade lower than 80%.
- **For all students in the Fall 2024 Level II Evening Program Option, continuing or returning,** any final letter grade lower than a "C" or a numerical grade lower than 70%.
- **For all students entering the Spring 2025 Evening Program Option, continuing or returning,** any final letter grade lower than a "B" or a numerical grade lower than 80%.
- **For all students entering the Advanced Standing LPN to RN Option beginning Summer 2024, continuing or returning,** any final letter grade lower than a "B" or a numerical grade lower than 80%.

Note: Numerical grades are not rounded.

Withdraw: Failure to attend any nursing course for which the student is registered or failure to complete a course that was started. This excluded the grade of Incomplete ("I")

Medical Withdrawal: Students are required to provide the Nursing Program Director with Notification of inability to complete or attend a required course due to a change in medical condition. Student must receive College approval for a Medical Withdrawal. Upon request to return, student must provide the Nursing Program with documentation from their care provider* that they are able to return to nursing program and comply with the required abilities without restriction.

** this should be the same provider(s) who initiated medical withdrawal*

Procedure:

Students who wish to petition for readmission to the Nursing Program should complete the following:

- Submit the Petition for Readmission form to the Director of Nursing
- Meet with course faculty or academic advisor to develop a plan for academic success
- Schedule a meeting with the Nursing Program Director to discuss the plan for academic success

A petition for readmission does not guarantee a return to the Nursing Program.

Petitions are granted based upon seat availability.

Each petition is considered on an individual basis.

Students returning after a College approved Medical absence will be considered before those who have failed a course.

Students returning will be placed in the College Catalog year of the cohort in which they return and also the cohort in which they complete the program

STANDARDS OF STUDENT CONDUCT GUIDELINES

Purpose: It is the position of the nursing program and the college that students admitted to the nursing program be required to maintain an ethical and legal standard of conduct as established by the American Nurses Association (ANA). <https://www.nursingworld.org/practice-policy/nursing-excellence/ethics/code-of-ethics-for-nurses/>

Guideline: Students are expected to exhibit standards of conduct which are compliant within Westmoreland County Community College, Clinical Education Facilities and the American Nurses Association Code of Conduct.

A. While enrolled in the Westmoreland nursing program it is expected that students will:

- Not incur a felonious conviction. The nature of the conviction may have a direct effect on licensure.
- Not use or consume illegal substances. The college reserves the right to refer students to a healthcare professional the event of a violation or a suspected violation of this provision. The student is responsible for all of the costs of this referral.
- Comply with the college "Code of Student Conduct" as outlined in the current *College Catalog* and/or *College Student Handbook*.
- Adhere to the *College Academic Integrity Policy*
- Display conduct on and off campus in a manner consistent with the standards of the academic and professional community per the nurse's Code of Conduct published from the American Nurses Association (ANA)
- Provide care within the legal and ethical framework of nursing practice
- Exhibit conduct in the clinical setting as described by both the course and clinical institution guidelines

B. Incidents that violate standards of student conduct or patterns of misconduct throughout the program may result in dismissal from the program.

- The student shall be required to cooperate in any investigation of information received by the college, but not previously reported by the student that may have bearing on the fitness of the student to continue in the nursing program.
- The student may be required to execute a waiver that authorizes the college to review applicable records from involved agencies.
- Failure to cooperate fully in investigations of misconduct may result in the immediate suspension or dismissal of the student from the nursing program

TRANSFER PROCEDURE GUIDELINES

Purpose: Individuals seeking to transfer into the Westmoreland County Community College (Westmoreland) nursing program from other nursing programs must meet all of the criteria as specified in the Westmoreland College Catalog, college website selective admission procedure, and Student Handbook for admission and graduation requirements.

Guidelines: Transfer requests into the Westmoreland nursing program will be considered on an individual basis and be made one full semester prior to the semester of desired transfer.

A. Credit

1. Consideration for transfer of credit will be completed by the College
2. Consideration of credit by examination (Refer to the *Westmoreland Catalog* and *Student Handbook* for the credit by examination procedure) will be completed by the college.

Note: Credit by examination is not approved for nursing courses.

B. Graduation

- To be eligible for graduation, students transferring into the Associate Degree nursing program must earn at least 30 credits of degree requirements at Westmoreland under faculty instruction and evaluation. Twenty (20) of these 30 credits must be nursing credits.

**WESTMORELAND
NURSING
PROGRAM**

Section IV
COURSE GUIDELINES

ATTENDANCE GUIDELINES

Purpose: Absenteeism results in missed learning experiences and may compromise the student's ability to meet the nursing program outcomes successfully. Therefore, attendance is expected.

Guidelines: Attendance at all scheduled lecture, laboratory, and clinical sessions is expected.

A. Campus Laboratory

- The teaching and practice of technical skills related to theory occurs in the campus laboratory setting. It is critical for students to attend all campus laboratory sessions to be safe and functional in the clinical setting. Nonattendance in a campus laboratory where clinical skills are being taught may require the student to schedule a lab makeup through the Nursing Learning Resource Center (NLRC)

B. Clinical (Health Care Facility based, Virtual or Simulations)

- Clinical attendance, regardless of modality, is evaluated under the critical element, "Commitment"
- The clinical instructor evaluates the performance of students in relation to the course clinical learning outcomes. A student who is not in attendance, regardless of modality, cannot be evaluated on the outcomes and no documentation of clinical outcomes can be completed. Excessive clinical absences could result in failure of the course as no documentation for demonstration of clinical academic activity.
- A student is not permitted to leave the clinical site, skills day, or simulation during scheduled clinical hours without approval from the faculty member.
- Participation in all scheduled simulation exercises is a requirement of nursing courses in order to fulfill course objectives. Non-participation in any simulation assignment may result in failure of that course.
- Clinical Skills Days (College campus based or virtual) Participation in all scheduled clinical skills days is a requirement of nursing courses in order to fulfill course objectives. Non-participation in any clinical skills day assignment may result in failure of that course. Missed clinical skills day must be made up in the NLRC. Course faculty will provide make-up schedule.

C. Medical Absences

- A student absent for medical reasons may be required to provide written verification from the treating physician, permitting the student to return to the campus laboratory and/or clinical setting without restrictions.

D. Withdrawal

- Excessive clinical absences could result in failure of the course as no documentation for demonstration of clinical academic activity.

Responsibility: Program Eval/By-laws Committee

CLINICAL LABORATORY DRESS CODE GUIDELINES

Purpose: A dress code for the clinical experience, including simulation, is required for identification of the student nurse, patient safety, patient comfort, and infection control. Students are expected to maintain a high standard of personal cleanliness.

Guidelines: Students must observe the following regulations. If the student does not adhere to the dress code, the faculty member has the authority to deny the student access to the clinical experience or simulation and an absence for the day will be recorded. Continued failure to follow these guidelines will lead to disciplinary action and/or dismissal from the program.

A. Uniform

- The Westmoreland nursing uniform is worn for clinical education including skills days and simulation. It must be clean and pressed.
- Socks are to be worn with the pant uniform. Plain skin toned or white hose are to be worn with the dress uniform.
- If wearing a uniform with a skirt, a slip or undergarment must be worn. The dress uniform is to be worn no shorter than the knee cap.
- Westmoreland College Photo IDs are to be worn at all times. In addition, when attending hospital or community based clinical education, appropriate facility identification badges are to be worn at all times.
- White or black leather shoes with non-slip soles and without colored logos are to be worn. Shoes must have a closed toe and heel. Sandals, clogs, rubber or canvas shoes are prohibited.
- Shoes, including any laces must be clean and in good condition
- White lab jacket or Westmoreland warm-up jacket may be worn with the uniform
- On clinical units requiring attire other than the Westmoreland uniform, the dress code will be defined by clinical facility or faculty

B. Westmoreland White Lab Jacket

- Westmoreland lab jacket and street clothes may be worn for designated clinical laboratory sessions
- Business-like clothing is to be worn for any pre-planning experience. No shorts, blue jeans, leggings or sweat suits are permitted. Appropriate attire includes collared shirts and khaki or dress pants business skirts or dresses. Nylons must be worn with skirts or dresses. Open toed shoes, spike heels or athletic shoes are not permitted.
- Westmoreland student identification, and appropriate facility identification must be worn in the clinical area.
- Lab jacket must be clean and pressed.
- Westmoreland warm up jacket is not acceptable attire for pre-plan.

C. Scrubs

- When unit specific facility scrub clothes are required on a clinical unit, they will be provided by the clinical facility; Westmoreland student uniform must be worn to and from the clinical facility

D. Hair

- Must be clean, neatly groomed and worn off the collar
- Long hair must be tied and pinned up
- Sideburns, mustaches, and beards must be neatly trimmed or faces clean shaven.
- Only natural occurring conventional hair colors are permitted

E. Jewelry:

When preplanning, in campus laboratory, simulation or on the clinical unit, the student may:

- Wear a plain ring band, a watch with a second hand, and one small, plain post earring in each ear; no other jewelry is permitted, **the student may not wear** necklaces, bracelets, ear gauges, tongue, eyebrow or other visible body piercings.

F. Cosmetics:

When preplanning or on the clinical unit and during simulation, the student may not wear

- Perfume, perfumed hair spray, cologne, or aftershave
- Artificial nails, overlays, tips, wraps or nail ornaments
 - Natural fingernails must not extend beyond the length of the fingertip and must be kept clean.

When preplanning, or on the clinical unit or simulation, the student may wear:

- Cosmetics in moderation

G. Chewing Gum:

When preplanning, in campus laboratory, or on the clinical unit or simulation, the student may not:

- Chew gum

H. Tattoos: When preplanning or on the clinical unit or simulation, the student must:

- Keep all visible, offensive tattoos covered

Dates Revised: 07/01/2024, 6/01/2023, 5/2019, 11/24/2015, 1/23/14, 5/24/06, 5/5/04, 5/1/03,

Dates Reviewed: 6/5/2022, 7/20/20, 1/18/2018, 2/16/17, 6/4/07, 5/7/08, 4/7/11

Next Date to Review: Fall 2027(every 3 years)

Responsibility: Program Eval/By-laws Committee

COURSE EVALUATION GUIDELINES

Purpose: The student must achieve a passing grade in theory, campus laboratory, clinical laboratory and complete all assignments and demonstrate satisfactory performance of Course Specific Learning Outcomes (CSLOs) to pass the course.

Guideline: For students currently enrolled in the Daylight Program Option or in NSG 124 of the Evening Program Option courses, the student must achieve a theory grade of "B" or better to pass the course.

Final course evaluation may include theory, campus laboratory, written assignments or assessments and clinical laboratory components.

A. Theory Grade

For students enrolled in Level II Evening program Option (NSG 260, NSG 270 or NSG 280) nursing courses

- The minimum passing grade in theory is "C". There is no rounding of grades in nursing courses.
- The theory grade may include theory and/or campus laboratory examinations, quizzes, and /or assignments as described in each course syllabus.
- Grade determination is described in the course syllabus.

For students enrolled in nursing course in the Daylight Program options and NSG 124 of the Evening Program Option

- The minimum passing grade in theory is "B". There is no rounding of grades in nursing courses.
- The theory grade may include theory and/or campus laboratory examinations, quizzes, and /or assignments as described in each course syllabus.
- Grade determination is described in the course syllabus.

B. Clinical Grade

- The student must achieve a satisfactory clinical grade in order to pass any clinical nursing course
- An unsatisfactory clinical grade results in the assignment of a final grade in the nursing course of "D" (See clinical evaluation Guidelines)
- To successfully pass clinical for each course, a student must have an average score for each CSLO that is at or higher than the identified level of achievement.

NSG 116	NSG 124	NSG 225, NSG 240, NSG 255, NSG 260, NSG 270	NSG 280
Student must achieve a minimum score of 2 for each CSLO	Student must achieve a minimum score of 3 for each CSLO	Student must achieve a minimum score of 3 for each CSLO	Student must achieve a minimum score of 4 for each CSLO

C. Clinical Skills

- The student will perform clinical technical skills correctly and safely to meet course objectives.
- If a student receives an average score for each CSLO that is below the identified level of achievement a remedial plan may be put in place.
 - Students will need to demonstrate the corrected action in order to achieve the identified minimum score for each CSLO.
- The student should conference with their clinical faculty member prior to the clinical demonstration of any new skills.

1. Scoring of a CSLO per defined rubric is given when the student:
 - Performs all elements of the clinical objectives correctly and in the appropriate order.
 - Answers questions correctly about the technical skill.
 - Corrects errors made without prompting.
 - Performs correctly and in sequence with some prompting.

2. Scoring of a CSLO below minimum achievement per defined rubric is given when the student:
 - Omits the critical element(s) of a technical skill and does not recognize the omission.
 - Is unable to answer questions about the skill.
 - Makes error(s) and does not recognize the error(s) independently
 - Is obviously unprepared to perform the skill safely on clinical.
 - Requires prompting at every step.

D. Written Assignments

- Submitting all course assignments as scheduled is required in nursing courses
- Submitting assignments late demonstrates a lack of commitment to learning and will negatively affect the course grade. See course syllabus
- Clinical written assignments submitted late will be noted as an unsatisfactory behavior related to commitment on the clinical evaluation form and may result in failure of the course.
- Faculty may offer the student the option of re-submitting the assignment by a specified date. The assignment will be re-evaluated and noted on the clinical evaluation form. See course syllabus
- Theory and campus laboratory assignments not submitted on the specified date may negatively affect the grade or result in an incomplete "I" grade or failure for the course.
- Specific penalties for each late assignment will be identified in each course syllabus.

CLINICAL EVALUATION GUIDELINES

Purpose: In order to pass clinical, students must demonstrate meeting the minimum level of achievement expected to pass the course as defined by the grading rubric. Evaluation of learning outcomes will be evaluated using the Clinical Evaluation Tool based on the Course Student Learning Outcomes (CSLO's) specific to each course. Failure of the clinical component of a course will result in a final grade of "D" in the nursing course unless theory grade is below passing.

Guidelines: The following documents and forms are used to guide, evaluate and document the student achievement of learning outcomes in the clinical laboratory component of the course:

Students are evaluated on clinical achievement using a variety of summative and formative methods specific for that course.

The following forms may be also be used in addition to identified course specific methods.

- **Commendation Form** for outstanding clinical performance by a student (students may also be recognized for non-clinical performance).
- **Clinical Final Evaluation Tool** based on the course CSLOs
- **Curriculum Progression Map (End of Program Student Learning Outcomes (EOPSLO's))**
- (See grids for caring, competency, communication, clinical judgement, and commitment in **Westmoreland Nursing Program Student Handbook**) - operationalizes each critical element and identifies the corresponding learning outcomes for each course; clinical outcomes identify expected behaviors that indicate growth toward the attainment of learning outcomes for each course and throughout the nursing program.
- **Incident Report Form** – documents potential and/or actual errors/incidents on the clinical unit
- **Remedial Plan Form** – implemented by faculty for students who are not progressing satisfactorily toward the attainment of the learning outcomes.

Dates Revised: 6/01/2023, April 2022; 7/20/20, 12/04/2015, 6/5/08, 4/30/02, 5/3/01

REMEDIAL PLAN FOR IMPROVING CLINICAL PERFORMANCE GUIDELINES

Purpose: Formal remediation is indicated if student's clinical performance is not progressing towards meeting the learning outcomes of the course.

Guidelines: The learning outcomes related to a critical element can be addressed in any nursing course. The critical element "Commitment" can be addressed for the course, level, or program at the discretion of the faculty member who initiates it (refer to "Standards of Student Conduct Guidelines"). The clinical faculty member will prepare a written remedial plan and notify the course coordinator.

A. Plan Components (See attached sample "Remedial Plan"):

- Specific description of the deficiency/problem(s) and identification of the corresponding learning outcome(s) that are not being met successfully
- Description of student actions necessary to demonstrate progress toward meeting the learning outcomes identified
- Established time interval for evaluation of student progress
- Signature and date of both student and faculty member

B. Distribution:

- Copy of plan given to student
- Copy of plan attached to final Clinical Evaluation form"
- Copy of plan placed in student's file in nursing office
- Copy of plan sent to course coordinator

C. Implementation

- As long as plan is ongoing, progress is recorded in weekly clinical written assignments
- Progress will be discussed with the student at weekly or more frequently for the length of the course.
- Any updated plans will be signed by both the faculty and student

Dates Revised: 7/20/20, 12/04/2015, 6/4/07, 5/2/05, 5/3/01, 12/19/96, 4/30/92

REMEDIAL PLAN FORMAT with EXAMPLE

Course _____

Name _____ Date _____

Course Specific Learning Outcome (CSLO)

- CSLO # 3: Apply therapeutic and professional communication when participating in collaborative care- Did not report necessary information when reporting off to primary nurse 11/15/19.
- CSLO # 5: Employ information technologies to coordinate safe care –Preplan not completed and insufficient to provide safe care-10/ 29/19, 11/18/19
- CSLO # 6: Incorporate nursing actions with the legal and ethical framework of nursing practice by conducting self in a civil and professional manner -Was publicly disrespectful to instructor on above dates

Data: See *Anecdotal* or additional documentation

Plan: *Include the plan to remediate the behaviors identified*

- Must always treat care team, (including instructor) with respect at all times
- Must report off using appropriate manner outlined by Westmoreland policy and clinical faculty
- Must have preplanning complete and show it to instructor prior to the clinical experience
- Must complete all course assignments by date specified
- Must outline a plan for organizing self to have all necessary preplan, concept maps and care plans completed by designated time
- If _____ (*student's name*) does not meet this plan by _____ (*date*) he/she will fail this course clinically

INCIDENT REPORT GUIDELINES

Purpose: Students must be aware of both potential and actual errors/incidents when on the clinical unit; appropriate action must be taken to prevent further incidents.

Guidelines: Faculty will complete the "Incident Report" form (See attached) and consider the incident when evaluating the student's ability to attain the clinical course outcomes.

For all incidents, the clinical instructor must:

- Use the Westmoreland "Incident Report" form to document the incident.
- Review the incident with the student and obtain the student's perception of the incident.
- Share with the student what they believe to be the cause of the incident (or error if applicable) and is to be documented on the incident report form where indicated.
- Document the action taken in response to the incident (or error).
- Establish a plan with the student to prevent such an incident or error from occurring again and document the plan.
- Document any other pertinent information on the incident report form.
- Forward the original incident report form to the Director of the Nursing Program and a copy to the course coordinator within 24 hours of the incident. The clinical instructor may keep a copy of the completed form (which is confidential). This form is the property of the College.
- Attach a copy of the completed incident report form to the "Clinical Evaluation Form" and include a description of either the actual or potential error/incident on the "Reflective Log of Learning Experiences."
- File a facility incident report if indicated; it is the property of the facility.

If the incident involves a patient:

- The clinical instructor must document the name of the patient, patient's room number, and the extent of the incident on the incident report form.
- The clinical instructor should notify the Director of the Nursing Program as soon as possible after the incident is reported, if there is any question about the seriousness of the incident.

If the incident involves a medication error:

- The clinical instructor will review the ten rights of medication administration with the student.
- That is due to incorrect dosage calculation, the clinical instructor should require the student to demonstrate mastery of the principles of dosage calculation related to medication administration; the student may be required to review the calculation process using software available in the computer laboratory or with the NLRC

INTRAVENOUS THERAPY GUIDELINES

Purpose: To ensure the safety of the patient, all intravenous (IV) therapy must be administered under faculty supervision and follow appropriate institutional policies and procedures.

Guidelines: All faculty and students must adhere to the policies of their assigned clinical facilities. Level I and Level II student responsibilities and restrictions follow:

Definition of Terms: Direct supervision of faculty- faculty are physically present with the student during IV therapy.

A. Level I Students may, under the direct supervision of the faculty:

- Students enrolled in NSG 116 after completion of IV skills may:
 - Remove an IV from the pump to change patient gown or other clothing.
 - Administer, monitor, and document the effects of IV fluids and IV medications via central lines and peripheral lines
 - Flush peripheral and central lines with normal saline or a heparin flush solution with a concentration no greater than 100 units per milliliter per facility protocol
 - Discontinue peripheral IV lines
- Students enrolled in NSG 124: (after completion of IV skills lab)
 - Complete all NSG 116 Skills
 - May administer IV push medications
 - Perform central line site care and/or dressing change
 - Change cap(s) or tubing that opens a central line to air
 - Administer total parenteral nutrition (TPN) via central or peripheral lines
 - Administer IV narcotics via intravenous push (IVP) and patient controlled analgesia (PCA)

B. Level I Students (in any course) May NOT:

- Administer Chemotherapeutic agents
- Administer blood or blood products
- Administer medications requiring specialized training
- Access or de-access an implantable port
- Titrate medications that require specific physician parameters, institutional protocol, and/or patient assessment data
- Perform venipuncture
- Administer epidural medications

C. Level II Students may, under direct supervision of the faculty:

- Perform the IV responsibilities of a staff nurse in that institution of unit assigned
- Administer, monitor and document effects of IV fluids and medications via peripheral and central lines
- Administer IV push medications
- Administer IV narcotics via intravenous push (IVP) and patient controlled analgesia (PCA)
- Administer total parenteral nutrition (TPN) via central or peripheral lines
- Change central line tubing, caps, and dressings
- Titrate medications using specific physician parameters, institutional protocol, and patient assessment data
- Administer Rhogam

D. Level II Students (in any course) May not:

- Administer IV Chemotherapeutic drugs
- Administer blood and blood products requiring type and/or cross matching
- Access or de-access an implantable port
- Administer epidural medications
- Perform venipuncture
- Administer medications to a labor and delivery patient

TESTING ACCOMMODATIONS IN THE NURSING PROGRAM GUIDELINES

Purpose: to facilitate the elimination of testing barriers that may hinder the academic success of Nursing Program students with disabilities and to maintain compliance with the Americans with Disabilities Act (ADA) of 1990, including changes made by the ADA Amendment Act of 2008, and Section 504 of the Rehabilitation Act of 1973.

Guideline: The nursing Program requires students with disabilities who need academic accommodations to contact the Disability Services Office to schedule an appointment. The Disability Counselor is solely responsible to determine the student's eligibility for accommodations and for which accommodations the students are eligible. In providing accommodation, the Nursing Program

- Does not need to eliminate or lower requirements
- Does not need to make modifications that would result in fundamental alteration of the program or activities offered
- Does not need to accommodate in such a way that it would impose an undue financial or administrative burden on the Program
- At the beginning of the semester in which the student has requested accommodations, or at the point when the student requests accommodations, academic accommodation emails are sent from the disability counselor directly to the faculty member and the student
- Students are responsible to communicate with faculty members about the accommodations. This communication will be through Westmoreland College email. Faculty are not obligated to implement accommodations until the student communicates with them about it.
- Nursing program students may be required to utilize the Center for Teaching and learning (CTL) on the Youngwood campus or assigned locations at the Education Centers for all exams and quiz accommodations.
- To ensure the safe practice of nursing, extended time or distraction reduced environment do not apply to nursing skills tested in Clinical laboratory, Simulations or Clinical Settings
- Students must follow the guidelines established at the Education Center or the CTL to schedule their testing appointment. The student will notify their faculty of the appointment date and time
 - Students should not schedule testing time that will interfere with the ability to attend scheduled lecture, laboratory or clinical.
- Students may elect to waive their testing accommodation prior to each exam and quiz
 - Students must notify faculty through Westmoreland College email, 3 days prior to testing if they elect to waive their accommodations for a specific exam or quiz
 - Once testing has been completed, students who elect to waive their accommodation will not be offered additional attempts to complete the specific exam or quiz.

Dates Revised: 01/01/2020

Dates Reviewed: 06/01/2023, 7/20/20

Next Date to Review: Fall 2026 (every 3 years)

Responsibility: Curriculum/Student Standing

SOCIAL MEDIA GUIDELINES

Purpose: Student nurses have a responsibility to understand the benefits and consequences of participating in social media. Social media is defined as web based and mobile platforms for user generated content that create interactive and highly accessible, and often public dialogues.

Types of social media may include, but are not limited to:

- Blogging, Podcasting postings
- Social networking applications
- Social news sharing applications
- Social bookmarking/social tagging
- Video hosting and posting

Students **must** follow these guidelines when participating in social media.

Students are prohibited from:

- Transmitting electronically patient image that may be reasonably anticipated to violate patient rights to confidentiality or privacy, or otherwise degrade or embarrass the patient
- Sharing, posting or disseminating any information, including images, about a patient or information gained in the nurse-patient relationship
- Referring to patients by name or posting or publishing information that may lead to the identification of a patient
- Referring to patients in a disparaging manner, even if the patient is not identified
- Taking photos or videos of patients on personal devices, including cell phones
- Engaging in a personal relationship with a patient even if the patient initiates contact
- Making disparaging remarks about peers, instructors, patients, caregivers, members of the healthcare team or clinical facilities
- Making threatening, harassing, profane, obscene, sexually explicit, racially derogatory, homophobic or other offensive comments

Students must:

- Observe ethical and legal obligations to maintain patient privacy and confidentiality at all times
- Maintain professional boundaries in the use of electronic media
- Report promptly, any identified breach of confidentiality or privacy to the clinical instructor

Failure to follow these guidelines will result in disciplinary action, up to and including dismissal from the program.

GUIDELINE FOR STUDENT ROLE IN GOVERNANCE OF THE NURSING PROGRAM

Purpose: Nursing Program students are invited to participate in the governance of the Nursing Program. Participation is voluntary and does not impact course level evaluation of student performance.

Guideline: Students are invited to attend the monthly Nursing Faculty Organization (NFO) meeting to provide input in program decision making.

Notice of monthly meeting may be posted in the following ways:

- Written notice placed on Nursing Program Bulletin Board that will include location, date and time of meeting

Students interested in attending a meeting must notify the Nursing Program Director by email, one week prior to the meeting date to reserve a seat and if applicable, receive the Zoom Meeting link.

Seating is limited to 2 students during in-person meetings and 4 students during Zoom meetings.

Student attendees will be provided a copy of the meeting's agenda one day prior to the meeting.

Students are invited to provide input in program decision making discussion but will not have a vote.

As portions of the NFO may involve confidential matters, at the discretion of the meeting Chairperson, students will be asked to leave the room/meeting and may return after the item has been discussed.

Section V
SUPPLEMENTAL INFORMATION

NURSING PROGRAM GUIDELINE FOR COMMUNICABLE DISEASE PRE-SCREENING RESPONSIBILITY

Purpose: To provide guidance for students and faculty to promote a safe clinical learning environment. Also, to comply with the required communicable disease pre-Screening requirement of each individual clinical agency.

Guideline: Faculty and students may be required to complete a communicable disease pre-screen prior to each clinical day.

1. Clinical faculty will be responsible to review the Pre-screening Guidelines for their assigned clinical agency.
2. Students will be responsible to review the Pre-screening Guidelines for their assigned clinical agency.
3. Clinical faculty will review and discuss the clinical agency pre-screening guidelines with student during the clinical orientation session. Student questions will be addressed.
4. Clinical faculty and student will comply with the specific agency pre-screening guideline.
 - a. It is the responsibility of the clinical faculty to assure all students have completed the required pre-screen process each clinical day
 - b. It is the responsibility of each student to complete the pre-screening process completely and honestly.
 - c. Failure to comply with the clinical agency pre-screening guidelines may result in clinical failure.
5. If faculty is not otherwise ill but does not meet the pre-screening requirement for entrance to the clinical unit, hospital based clinical will be cancelled and a remote option will be assigned to the student. Faculty will notify Nursing Program Director and the clinical unit.
6. If a student is not otherwise ill but does not meet the pre-screening requirement for entrance to the clinical unit, the student will not be marked absent, rather offered an alternate assignment. Students must successfully meet all clinical requirements to pass the clinical portion of their course.

ASSUMPTION OF RISK WAIVER FOR HEALTH PROFESSION STUDENTS

Health Profession Students are at high risk of exposure to communicable diseases and blood borne pathogens. All Westmoreland County Community College Health Professions Students are required to read and sign the following document Assumption of Risk and Waiver of Liability relating to Communicable Disease and Blood Borne Pathogens.

- I am aware of the risks of exposure to communicable disease and blood borne pathogens and that my attendance at Westmoreland may result in contracting a viral or bacterial infection and/or spreading the infection to others
- I understand that the nature of my courses may at times require me to come in contact with others and place me at higher risk to contract a viral or bacterial infection.

I agree to follow all state, county, and college safety protocols including but not limited to:

- Receive required vaccination per the clinical agency requirements.
- Perform proper handwashing technique before and after contact with all persons and associated equipment.
- Use an alcohol-based hand sanitizer when hand washing is not readily available.
- Follow required social distancing protocols at all times unless close proximity or direct contact is required as part of instruction (with proper PPE as required).
- Perform and document a self-check prior to reporting for clinical education at an associated clinical facility.
- Follow the proper use of PPE including gloves, masks, and face shields for all student/instructor contacts while in the Clinical setting, Campus Laboratory or participating in Simulations.

By signing this document, I acknowledge the contagious nature of viruses and bacteria and voluntarily assume the risk (known or unknown) that I may be exposed to or infected by a virus or bacteria by attending classes at Westmoreland County Community College and that such exposure or infection may result in personal injury, illness, permanent disability and/or death. I understand that the risk of being exposed to or infected by a virus or bacteria at Westmoreland County Community College may result from the actions, omissions, or negligence of myself or others, including, but not limited to Westmoreland County Community College employees, volunteers, and other students.

By signing this document, I, for myself, heirs, personal representatives and assigns, do hereby release, waive, discharge, and promise not to sue the Westmoreland County Community College, the Board of Trustees, administrators, faculty, staff, volunteers, and agents from liability from any and all claims resulting in personal injury (including disability or death), accident or illnesses, damages, and any losses of property in connection with my attendance or participation in programming at the Westmoreland County Community college, its employees, agents, and representatives, whether a viral or bacterial infection occurs before, during, or after participation in any Westmoreland County Community College Program.

EOPSLO # 2 Competency (QSEN: Safety) <i>Implement technical aspects of care by following standards of safe, professional practice.</i>	NSG 112 Discuss technical aspects of care by reviewing standards of safe, professional practice. NSG 114 Describe the implementation of technical aspects of care by following standards of safe, professional practice throughout the lifespan	NSG 116 Describe the implementation of technical aspects of care by following standards of safe, professional practice.	NSG 124 Demonstrate technical aspects of care by following standards of safe, professional practice for the adult patient.	NSG 225 Apply technical aspects of care by following standards of safe, professional practice to the childbearing family, infant, and child. NSG 240 Apply technical aspects of care by following standards of safe, professional practice to the behavioral health client.	NSG 255 Apply technical aspects of care by following standards of safe, professional practice to the aging adult. NSG 260 Apply technical aspects of care by following standards of safe, professional practice to the chronically ill adult. NSG 270 Apply technical aspects of care by following standards of safe, professional practice to the acutely ill adult.	NSG 280 Implement technical aspects of care by following standards of safe, professional practice.
