

Nuclear Medicine Technology, Diploma

School of Health Professions

Program Description

The Nuclear Medicine Technology Diploma Program trains individuals to become professionals skilled in using radioactive materials and specialized equipment to diagnose and treat diseases. The program prepares students for a career as a nuclear medicine technologist, focusing on the safe handling of radioactive substances, operating advanced imaging equipment, and working closely with patients and healthcare teams.

Career Opportunities

Graduates of the Nuclear Medicine Technology Program typically find roles in Hospitals, Diagnostic imaging centers, Research institutions, and Outpatient care facilities. The programs equip students with the technical, medical, and interpersonal skills needed to succeed in a high-demand healthcare field.

This is a selective admission program. Please see the college website for details.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

1. Foundational Knowledge:

- Understand the principles of nuclear physics, radiation, and radiopharmaceutical chemistry.
- Explain human anatomy, physiology, and pathology as they relate to nuclear medicine procedures.
- Understand the biological effects of radiation on human tissue.

2. Technical Proficiency

- Operate and maintain nuclear medicine equipment, including gamma cameras, PET/CT scanners, and dose calibrators.
- Accurately prepare, handle, and administer radiopharmaceuticals.
- Perform imaging and non-imaging procedures, such as PET scans, SPECT scans, and organ function tests.

3. Safety and Compliance:

- Apply radiation safety principles to protect patients, staff, and the public from unnecessary exposure.
- Comply with federal, state, and institutional regulations regarding the use of radioactive materials.

- Safely manage the storage and disposal of radioactive substances.

4. Patient Care and Communication:

- Provide compassionate and culturally competent care to diverse patient populations.
- Communicate effectively with patients to explain procedures, address concerns, and ensure cooperation.
- Monitor patients for adverse reactions and respond appropriately to emergencies.

5. Analytical and Problem-Solving Skills:

- Evaluate diagnostic images and data for quality and accuracy.
- Collaborate with healthcare teams to analyze results and contribute to patient diagnoses and treatment plans.
- Troubleshoot technical issues with equipment and procedures.

6. Professionalism and Ethics:

- Demonstrate ethical decision-making and maintain patient confidentiality.
- Exhibit professionalism in interactions with patients, colleagues, and other healthcare professionals.
- Commit to lifelong learning and staying current with advancements in nuclear medicine technology.

7. Clinical Competence:

- Perform clinical procedures independently under supervision during internships or practicums.
- Document patient and procedure data accurately and efficiently.
- Adhere to best practices and protocols to ensure high-quality outcomes.

8. Certification and Career Readiness

- Prepare for national certification exams such as the NMTCB (Nuclear Medicine Technology Certification Board) or ARRT (American Registry of Radiologic Technologists).
- Develop the skills necessary for employment in hospitals, diagnostic imaging centers, or research facilities.

Nuclear Medicine Technology, Diploma

School of Health Professions

Sugg. Term	Seq #	Course ID	Course Title	Cr.	Prereq/Coreq(Co)	Options Available
Prior to Program Start	1	Certification in Radiography, Radiation Therapy or Nursing. Bachelor's degree in Science or Mathematics				
1st Fall	2	NMT 102	Applied Nuclear Medicine - PET Technology I	4	Admission to Program, BIO 171 (C or better)	
	3	ALH 122	Medical Terminology	3		
	4	NMT 150	Nuclear Medicine - PET Physics	3	NMT 100, HS Physics (C or better), or PHY 107 (C or better), or PHY 110 (C or better)	
	5	NMT 104	Nuclear Medicine - PET Instrumentation I	3	Admission to Program	
	6	NMT 165	Clinical Nuclear Medicine Education I	4	Co: NMT 152	
1st Spring	7	NMT 152	Applied Nuclear Medicine - PET Technology II	3	NMT 102; Co: NMT 150	
	8	NMT 154	Nuclear Medicine - PET Instrumentation II	4	NMT 104	
	9	RAD 211	Radiation Biology and Protection, Radiologic Procedures III, and Career Prep	4	RAD 215, RAD 255	
	10	NMT 175	Clinical Nuclear Medicine Education II	3	NMT 165	
1st Summer	11	NMT 185	Clinical Nuclear Medicine Education III	3	NMT 175	
	12	NMT 215	Clinical Nuclear Medicine Education IV	4	NMT 185
