

Physics, AS

School of Math, Science and Engineering

Program Description

The Physics AS degree is designed to prepare students for a rigorous four-year Physics program. This program focuses on the study of principles of physics, problem solving, critical thinking, laboratory skills, and technical communication. It is designed primarily for transfer to a Pennsylvania Transfer and Articulation Oversight Committee (TAOC) four-year college or university. It is designed to be the first two years of a bachelor's degree in Physics, but may also serve as preparation for other programs and some entry-level positions in STEM-related fields.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate an understanding of fundamental physics concepts and principles.
- Apply problem solving, critical thinking, and mathematics skills to physics problems.
- Work effectively with units and significant digits.
- Carry out physics experiments as well as accurately record and analyze results of such experiments in writing.
- Communicate technical details effectively with others.
- Work independently as well as in team environments.
